Software Developer

Passionate Software Developer with experience in Flutter, C# ASP.NET, and full-stack development. Skilled in building and testing RESTful APIs, manual testing, and project collaboration. Eager to contribute to innovative projects while expanding technical expertise in a professional environment.

WORK EXPERIENCE

Kingprice Insurance • 11/2025 - Present

Pretoria, South Africa

Software Developer Intern • Internship

- Developed and tested REST APIs using C# ASP.NET, improving backend functionality and reliability.
- Participated in manual software testing to ensure features met business requirements.
- Wrote and executed test cases to validate system functionality and reduce potential bugs.
- Used Git and Azure DevOps for version control and work tracking.
- Gained hands-on experience in Flutter development for mobile applications.
- Tested API endpoints using **Postman & Swagger**
- Used **Git** for version control and **Azure DevOps** for work tracking

Dynamic Visual Technology • 11/2024 - 12/2026

Johannesburg, South Africa

Development Trainee

- Participated in an web development training program
- Collaborated with peers on practical exercises to enhance understanding of front-end development concepts.
- Internship ended due to unforeseen circumstances

EDUCATION

IIE Rosebank College

Advanced Diploma In Application Development • 01/2024 - 12/2024

Diploma In Information Technology In Software Development • 01/2021 - 12/2023

Sunward Park high School

National Senior Certificate(Grade 12) • 01/2014 - 12/2020

CERTIFICATIONS

Azure Fundamentals (AZ-900) • 10/2024 - 10/2025

Microsoft

PROJECTS

AccessControl API – Role-Based Access Control System

ASP.NET Core | .NET 10 | SQL Server | JWT

- Designed and implemented RESTful APIs using **layered architecture (Controller–Service–Repository pattern)**.
- Applied **Role-Based Access Control (RBAC)** design pattern for scalable permission management.
- Designed relational database schema using **Entity Framework Core (Code-First approach)**.
- Implemented **many-to-many relationships** (Users ↔ Groups ↔ Permissions).
- Used **DTO pattern** and **AutoMapper** to separate domain models from API contracts.
- Applied **dependency injection** for loose coupling and testability.

PokeHub – Flutter Pokémon App

Flutter | Dart | Firebase | REST API

- Developed a modern mobile application to browse, search, and favorite Pokémon using PokeAPI.
- Implemented Firebase Authentication with Google Sign-In and user session management.
- Built infinite scrolling with optimized API requests for improved performance.
- Designed responsive UI with light/dark mode and clean Material Design.
- Applied MVVM architecture for better separation of concerns and maintainability.
- Wrote unit and widget tests to ensure reliability and code quality.

SKILLS

Programming Languages	FrameWorks	Tools & IDEs
• C# • HTML • CSS • SQL • Dart	• ASP.NET • .NET Framework • Bootstrap • React • Flutter	• Git • GitHub • Visual Studio • Visual Studio Code • Postman • Swagger • SQL Server • Azure
